

VACUUM DUST COLLECTOR

CAPTURE / COLLECT & TREATMENT / COMPRESSED AIR SUPPLY

FEATURES

- Washable reusable filter conforms To OSHA Standard 1926.1153
- Pressure: 6Bbar (87psi)
- Air consumption: 1 [m³min⁻¹] (35cfm)
- Vibration: 0
- 20 liters tank (5gal)

BENEFITS

- **No external energy needed:** the system works thanks to the compressor connection
- **The VDC system is universal:** it can be used with all hammers and brands
- **No water needed:** neither on the work itself, nor in the tank: the dust is absorbed by a washable HEPA filter
- **The system can be located up to 5m (16ft) away from the work:** more freedom for the worker
- **Light and portable package:** easy to carry around worksite
- **Low air consumption:** you need a 3.5 [m³min⁻¹] compressor to run VK23 Rock drill along with the VDC
- **Start/stop button for the dust collection system:** you decide when you start or stop it, independently from the hammer itself
- **To reduce noise, the VDC is equipped with a silencer**
